The **Leader as Coach Workshop** is designed for managers and HR professionals who want to learn how to take a coach approach in their leadership and management. The program will be full of tips and techniques for immediate skill application. Participants will learn their Coaching Style by taking a psychometrically sound and normed assessment of coaching behaviors and strategies called the **Coaching Mindset Index**. Participants will learn two distinct coaching methods, both behavioral coaching and developmental coaching, and will have plenty of opportunities to practice the methods, over the two sessions.

In *behavioral coaching*, participants will learn how to address the coaching and development needs of each employee. The workshop provides leaders with an actionable framework on how to conduct a behavioral coaching conversation, and participants will have an opportunity to develop an employee specific coaching plan.

In *developmental coaching*, participants will learn how to can integrate coaching seamlessly into their everyday interactions with their direct reports. Participants will learn three coaching foundations, six coaching strategies, and four coaching styles of the **Coaching Mindset Method**. Participants will receive a personalized report of their coaching behaviors that can improve their performance and effectiveness. Participants will learn a practical method to coach in 10 minutes or less.
